Reviews

This ebook is wonderful. It really is written in simple words and phrases rather than difficult to understand. Your daily life span will be change the instant you complete looking at this pdf.

SYNTHESIS, CHARACTERIZATION AND DECOMPOSITION STUDIES OF TRIS(N, N-DIBENZYLIDITHIOCARBAMATO) INDIUM(III): CHEMICAL SPRAY DEPOSITION OF POLYCRYSTALLINE

DOWNLOAD

Bibliogov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Tris(bis(phenylmethyl)carbamodithioato-S, S), commonly referred to as tris(N, N-dibenzylidithiocarbamato) indium(III), In(S₂CNBz₂)₃, was synthesized and characterized by single crystal X-ray crystallography. The compound crystallizes in the triclinic space group P1 bar with two molecules per unit cell. The material was further characterized using a novel analytical system employing the combined powers of thermogravimetric analysis, gas chromatography-mass spectrometry and Fourier-Transform infrared spectroscopy to investigate its potential use as a precursor for the chemical vapor deposition (CVD) of thin film materials for photovoltaic applications. Upon heating, the material thermally decomposes to release CS₂ and benzyl moieties into the gas phase, resulting in bulk In₂S₃. Preliminary spray CVD experiments indicate that In(S₂CNBz₂)₃ decomposed on a Cu substrate reacts to produce stoichiometric CuInS₂ films. This item ships from La Vergne, TN. Paperback.
